

# final interface design

## THE FINAL DESIGN, PROBLEMS AND SOLUTIONS

Place the final version of interface design for L1, L2, L3 including any possible interactions.

What are the conceptual solutions?

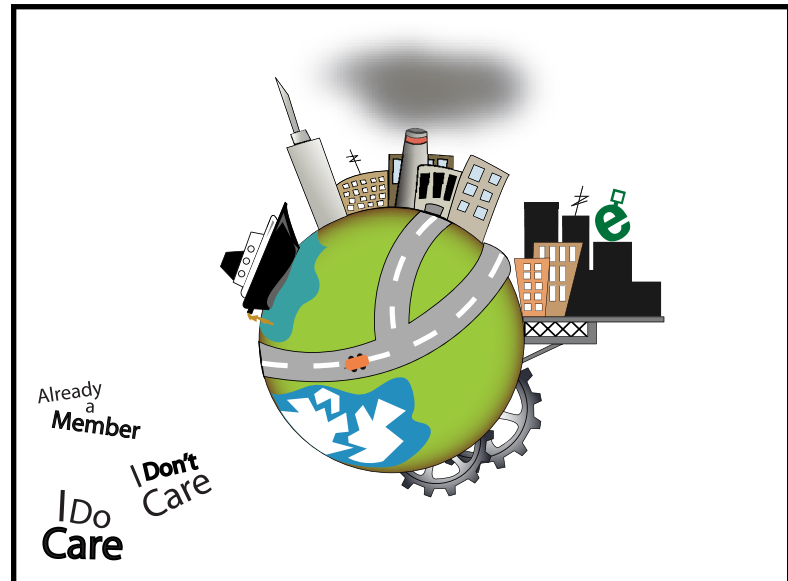

What are the visual solutions?

building up a city that highly depends on technology that pollute the atmosphere which leads to globalwarming and finally destroy our beloved planet. the viewer will have 3 choices after the city is built,

1: already a member which takes them directly to the blog.

2: I don't care which takes them to a black blank page.

3: i do care, which takes them to another movie clip.

After clicking on I Do Care, a new movie clip appears, showing how wonderful the earth is if we knew how to protect it. and they will have the choice to go through the website by clicking on the button "still interested"

The home page, is very simple, clean and informative. the navigation is so easy that the main menu shows in every page and the user can go through it easily.
